

If you always drove like a streak of lightning,
you'd want a windshield as tough as all thunder, too.

Why are so many things today made with durable Lexan® polycarbonate from GE? Winston Cup racer #17 is a solid example. The shatter-resistant windshield is pure Lexan®, as is Matt Kenseth's protective helmet. The DeWALT racing team insists on it. So should you when you shop. Be sure it's Lexan®. Only from GE.

Visit gelexan.com for more information.
